# PRODUCTION PROCESS

Our production ensures precision and top quality every time

## GUMMING TECHNOLOGY

WaterBased

AcrylicBased

Hot Melt

Quality of product depends majorly on type of gum based on its end application used and advancement in machine technology. With fully automated machines we provide different gumming technology material.

## SILICON COATED PAPER

We provide top-quality platinum silicon-coated paper at the best price, used in producing self-adhesive papers like chromo, thermal, polyester, tape, and medical products.

## SLITTING AND PACKAGING

Our high-capacity slitting and rewinding machines ensure efficient production and timely delivery, with safe & client-specified packaging by our Quality & Standards unit.

## PRODUCT QUALITY

As a quality-driven organization, we prioritize excellence at every stage of production, from raw material testing to final product checks. At Papier International, we offer precise slitting with flush winding, tailored to your required width and diameter. Our focus is to consistently provide reliable solutions that meet your exact needs, every time.
